PROFESSIONAL EXPERIENCE

Oracle India Pvt Ltd, Bangalore India – **Software Developer**, July 2018 – Aug 2024

Worked On Application Development Framework:

- Involved in continuous integration activities to improve product quality by 20%.
- Performed Regression Testing at various phases by automating the scripts to reduce the time by 60% per script.

Engaged in Automation:

- Design and development of automation framework and integrated with Continuous Integration tools Jenkins for running test on regular basis automatically that decreased manual efforts by 48%.
- Implemented BDD tests using Cucumber by writing behaviors and step definitions which increased the usability by 50% to make it easier to understand.
- Migrated existing Ant based automations to Maven Project to increase the performance by 40%.

Focused on Docker and Oracle Cloud Infrastructure:

- Built Docker images for oracle ADF and deployed docker containers for running the existing scripts and automation which shrunk the execution time and dependencies by 55%.
- Migration of scripts and automation from on premises to Oracle Cloud infrastructure cutting hardware usage by 61%.

EDUCATION

George Mason University (pursuing), Fairfax, USA
MS in Computer Science

Expected May 2026

RV College of Engineering, Bangalore, India (GPA: 8.65/10.0)
Bachelor of Engineering in Computer Science

August 2015 – July 2018

MEI Polytechnic, Bangalore, India (GPA: 90.95/100.0)
Diploma in Computer Science

August 2012 – May 2015

TECHNICAL SKILLS

- Programming Languages and Tools:** C, C++, Java, SQL, Excel, Jira
- Cloud and Distributed Computing:** Oracle Cloud Infrastructure, Docker, Kubernetes
- Database:** MySQL, Oracle
- Other tools and framework:** Jenkins, Selenium, JMeter, git, Cucumber framework, Junit, REST API Testing

PROJECTS

Brain Tumor Segmentation Using Convolutional Neural Networks in MRI images | 2018 - Python, Convolution Neural Network.

- To solve a clinical problem by using Neural Networks to diagnose brain tumor which accounts for 21% death in West.
- Engineered a machine learning algorithm to segment brain tumor in MRI Images which reduced the manual clinical time by 60-70% per case.
- Multiple convolutional layers, pooling layers, and activation functions to capture spatial hierarchies and complex patterns within the MRI scans, increasing accuracy by 7.2%.

Theft Monitoring System | 2017 – Java, Android Studio.

- Formulated an application to track the last known location of the phone to its alternate mobile number enhancing recovery speed for lost/stolen devices by 60%.
- Utilized Android's Location Services API for GPS tracking, SMS Manager for sending text messages, and Broadcast Receivers to detect SIM card changes integrated to an app with an efficiency around 70%.

Sonar Image Processing | 2016 – Python

- An automated system to identify objects in sonar images without human intervention.
- Techniques included median filtering, Gaussian smoothing, and adaptive filtering to smooth out irregularities while preserving important features which helped in having an efficiency around 85%.

School Management System | 2014 – PHP, HTML-5, MYSQL

- A centralized system for the benefit of teachers, students and parents. All the notes were digitized and uploaded on the portal through which students can download it and study at any time of the day which increased the performance of students by 30%.

LEADERSHIP EXPERIENCE

- Core Member of Women Leadership and Fun@Work Committee at Oracle India Pvt Ltd – Krishna Magnum.
- Contributing 50+ volunteering hours in Oracle Volunteering Projects.
