PROFESSIONAL EXPERIENCE

Quality Assurance Intern - Carfax, USA

May 2025 - Present

- Improved release quality and enabled early defect detection by executing smoke, regression, and A/B testing across web and mobile applications, resulting in a 32% improvement.
- Reduced manual regression testing by 73% by designing and implementing an automation framework using JavaScript, Playwright, and Cucumber-JS.
- Facilitated visibility and collaboration by performing API testing with Postman and developing a Slack bot that triggers automation suites and shares human-readable Cucumber reports accessible to both technical and non-technical stakeholders.
- Delivered on-time, high-quality releases across multiple projects by prioritizing tasks effectively and actively contributing to sprint planning, QA reviews, retrospectives, and closeouts.

Software Developer - Oracle India Pvt Ltd, Bangalore, India

July 2018 - August 2024

Worked on Application Development Framework:

- Refined product quality by 20% through streamlined CI/CD processes and the integration of automated testing tools.
- Performed Regression Testing at various phases by automating the scripts to reduce the time by 60% per script.

Engaged in Automation:

- Decreased manual testing efforts by 48% by designing and developing an automation framework integrated with Jenkins for regular automated test execution.
- Elevated test clarity and collaboration by 50% through BDD implementation using Cucumber and structured step definitions.
- Boosted automation performance by 40% by migrating existing Ant-based automation to a Maven project for improved build efficiency and dependency management.

Focused on Docker and Oracle Cloud Infrastructure:

- Enhanced team proficiency by leading internal training sessions after mastering and implementing Docker, Kubernetes, and JMeter for efficient containerization, orchestration, and performance testing.
- Reduced execution time and dependencies by 55% by building Docker images for Oracle ADF and deploying containers to run existing scripts and automation efficiently.
- Migrated scripts and automation from on-premises to Oracle Cloud infrastructure, reducing hardware usage by 61%.

EDUCATION

George Mason University, Fairfax, USA (GPA: 3.78/4)

Expected Graduation Date: May 2026

MS in Computer Science

RV College of Engineering, Bangalore, India (GPA: 8.65/10.0)

August 2015 - July 2018

Bachelor of Engineering in Computer Science

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, Perl
- **Others:** Oracle Cloud Infrastructure, Docker, Kubernetes, AWS, MySQL, Oracle database, Jenkins, Selenium, Playwright, JMeter, Git, Cucumber, JUnit, TestNG, REST API Testing, Microservices, JSON, XML, JavaScript, HTML, CSS, web services

PROJECTS

Supply Chain Management System | November 2024 - December 2024 – Python, cx_Oracle

GitHub [Link](#)

- Enabled seamless supply chain data operations by building a full-stack Flask web app with CRUD functionality, integrating cx_Oracle for real-time interaction with Oracle database tables like Items and Orders.
- Engineered an efficient user interface with HTML, CSS, and JavaScript enabling real-time data handling through GET, POST, and DELETE methods.

Brain Tumor Segmentation Using Convolutional Neural Networks in MRI images | December 2017 - May 2018 - Python, Convolutional Neural Network.

- Minimized manual clinical time by 60–70% by engineering a brain tumor segmentation model using CNNs with layered spatial pattern extraction.
- Delivered research project ahead of schedule with 7.2% higher accuracy by leading planning and optimizing deep learning models for MRI image analysis.

CERTIFICATION

- Oracle Cloud Infrastructure (OCI) 2025 Certified AI Foundations Associate.
- Oracle Cloud Infrastructure (OCI) 2025 Certified Foundations Associate.
